

Traveler Sire Line

Traveler Sire Line

Traveler Sire Line

QAS Traveler 23-4 is the best-known son of Band 234 of Ideal 3163 (Band 105). A 2017 Angus Foundation-funded research project revealed that "Traveler" was the most influential sire in the Angus breed. His genetics make up about 10% of Angus animals born today. (Band 105 accounts for 6.3% by Co-ancestry.) Traveler was the first direct son of Band 105 to have a major impact on the Angus breed and his daughters in AHIR (almost 9,000) post a combined 101 WW ratio. Traveler sons produced numerous sires who had a tremendously positive influence on the Jorgensen Herd and the entire Angus breed. We invite you to come take a look at our Orange-tag females and bulls.

Genetic Contributions: Calving Ease, Marbling, Functional Females
