Scan to listen to Cody & Jamie discuss the **Rito Sire Line**

Rito Sire Line: Martin Jorgensen bought an interest in Rito N Bar and Rito N Bar brought Jorgensen genetics into national prominence. RR Rito 707 took performance to an even higher level. He was the top-gaining bull at the 1968 PIC Bull Test (ratio 129), and his first progeny group of 27 steers recorded an average gain ratio of 111 while grading Choice (CAB grade, today). Fifty years of sons and daughters have compiled weaning weight & yearling weight ratios of 105, and his 453 daughters earned a combined 102 WW ratio. Today, Rito 0040 Magnum of Ideal is rightful head of the Rito Sire Line. He traces 350 times to Rito 707, yet has an Inbreeding Coefficient of only 13.43% per AHIR. He is impressing people with his masculine presence and his early calf crops have people excited about him.

Genetic Contributions: Muscle, Rapid Growth, Fertility, Carcass Merit, Appetite, and Efficiency.
